### ***Icelandair Boeing 737 MAX 8***

088

Icelandair is the flag carrier airline of Iceland, with its corporate head office on the property of Reykjavík Airport in the capital city Reykjavík. It is part of the Icelandair Group and operates to destinations on both sides of the Atlantic Ocean from its main hub at Keflavík International Airport. The geographical position of Iceland is convenient for one-stop transatlantic flights, which is one pillar of the airline's business strategy, along with traffic to, from, and within the country.

Icelandair traces its roots back to 1937, when Flugfélag Akureyrar was founded in Akureyri on the north coast of Iceland. Flight operations started in 1938 with a single Waco YKS-7 configured as a floatplane. In 1939 the airline was grounded when this aircraft was destroyed in a capsizing accident. The company moved to Reykjavík, where it acquired another Waco aircraft and was relaunched in 1940 as Flugfélag Íslands, which translates as Flight Company of Iceland

The Boeing 737 MAX is the fourth generation of the Boeing 737, a narrow-body airliner manufactured by Boeing Commercial Airplanes (BCA), a division of American company Boeing. It succeeds the Boeing 737 Next Generation (NG) and competes with the Airbus A320neo family. The 737 MAX is based on earlier 737 designs, with more efficient CFM International LEAP-1B engines, aerodynamic changes, including its distinctive split-tip winglets, and airframe modifications. The new series was announced on August 30, 2011. It took its maiden flight on January 29, 2016 and was certified by the U.S. Federal Aviation Administration (FAA) in March 2017. The first delivery was a MAX 8 in May 2017 to Malindo Air, with whom it commenced service on May 22, 2017.

Scale: 1:100  
Length: (395mm)  
Width: (358mm)  
Parts: 300 (12 pages)

Attach the parts in order.  
A1 - I6  
You can choose to make either a grounded style (With Wheels)  
or an in-flight style (without wheels) aircraft.

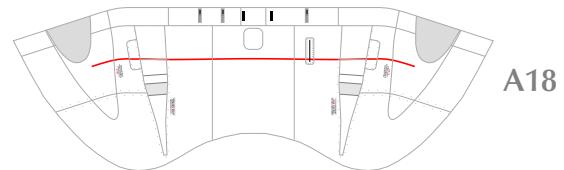

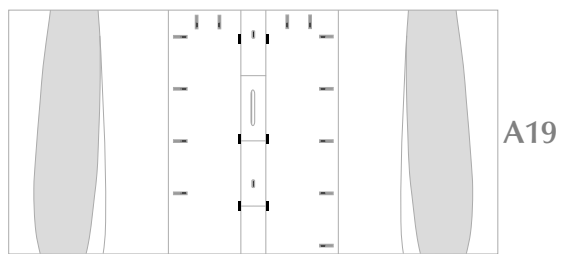

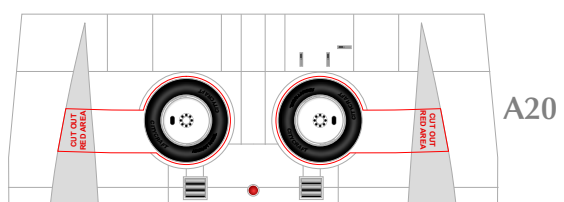

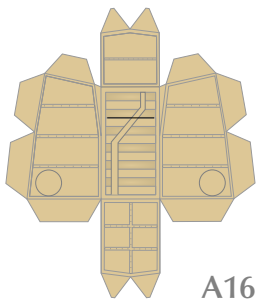

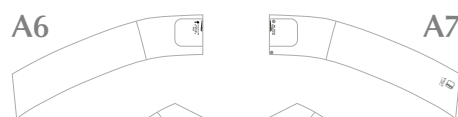

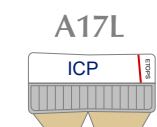

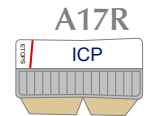

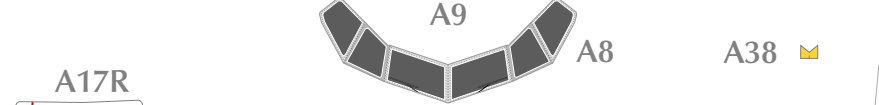

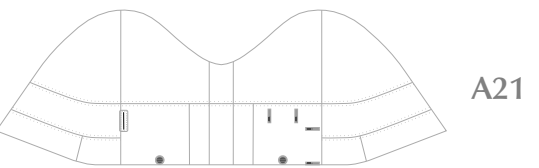

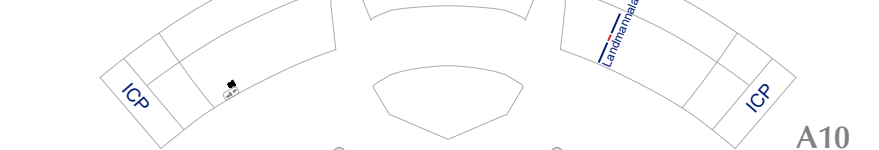

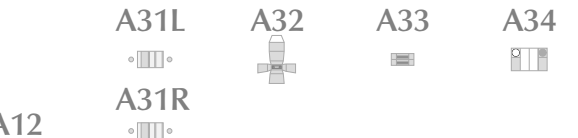

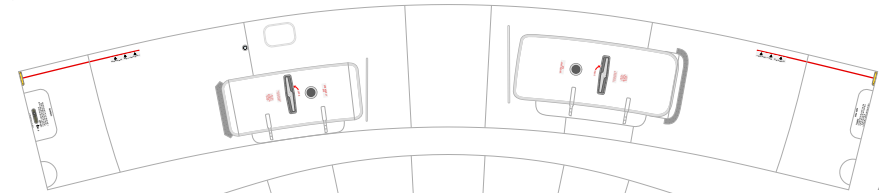

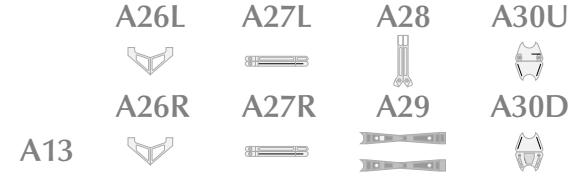

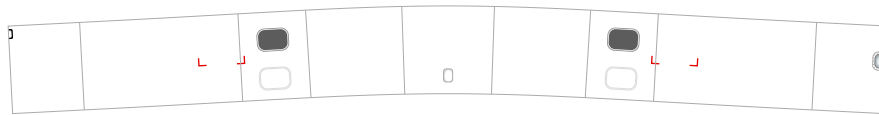

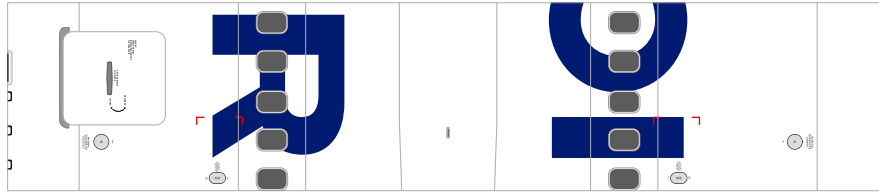

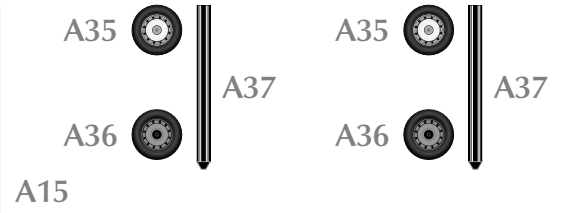

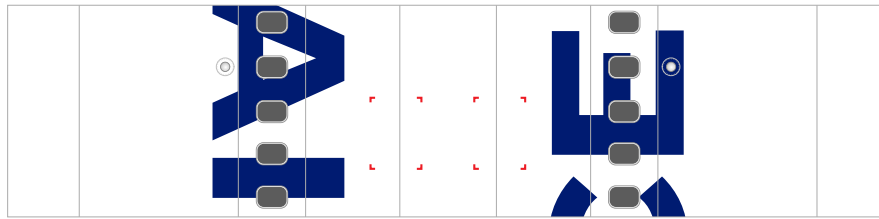

\*This model is designed for papercraft and is different in several ways from the real plane

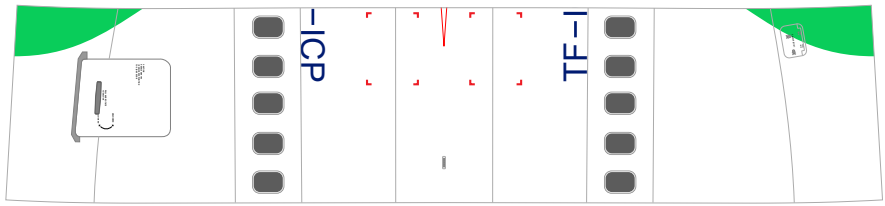

\*Build the model by carefully reading the Assembly Instructions.

\*The final size of the model may vary slightly depending on the configuration of your printer
